## Time Tunnel

Time... Travelling through time...

1968, love in the air and it feels so great  
Groovy is the word  
Live how you are and just ignore the herd

1973 and things are cool  
If you have got the bread you need to pay for fuel

1983 goes by  
Home computers multiply

Time... Travelling through time...

(1991)

*And Lo, brandishing axes and swords they came,  
The Acolytes of Byron did descend into the shadows  
halls of... The Academy*

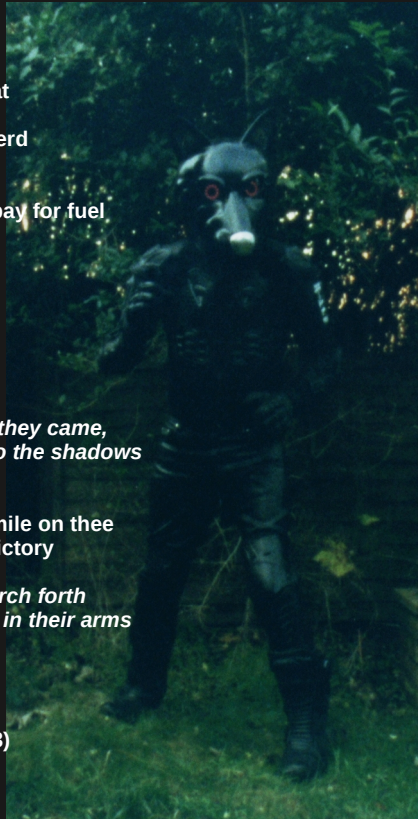

The year is 1996 – the gods of metal smile on thee  
By XP-50 and M1, the stage is set for victory

*And thus did the Acolytes of Byron march forth  
From that sacred place, bearing songs in their arms  
And victory in the hearts!*

2003, 2003, 2003...

(Excerpt from 'The Murder Game', 2013)

Time... Travelling through time...

## Monarch

"If I was a rich man" – that's *passe*  
Doesn't cut the mustard much today  
But there's larger dreams to dream

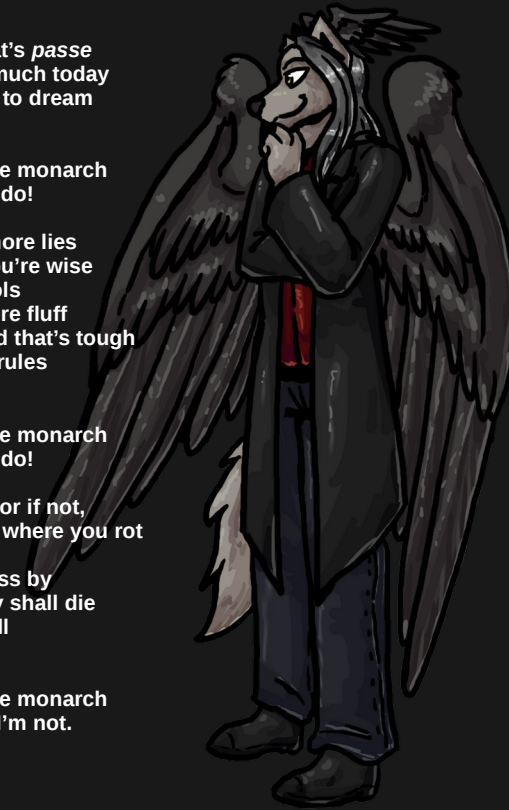

If I was a  
Psychotically evil absolute monarch  
All the things that I could do!

No more corruption, no more lies  
You'll do as I tell you if you're wise  
And I have no time for fools  
No more elections, no more fluff  
You'll do as I tell you - and that's tough  
'Cause I'm writing all the rules

If I was a  
Psychotically evil absolute monarch  
All the things that I could do!

You will kneel before me, or if not,  
Get sent to the dungeons where you rot  
You'll obey my every will  
Citizens shall bow as I pass by  
As I have decreed, or they shall die  
I have time and lives to kill

If I was a  
Psychotically evil absolute monarch  
...Thank your lucky stars I'm not.

## Pole Song

When the M1 was released in the late 80s, to critical acclaim,  
It introduced a number of signature sounds,  
Which became staples of dance and techno.  
One of these was the 'Pole',  
But I have no idea what you were supposed to do with it.  
So I made something up.

*Let's do The Pole... we'll make some broken rock'n'roll!*

*Let's do The Pole... we'll make some broken rock'n'roll!*

The successor to the M1 was supposed to be called the M10,  
But someone from marketing saw it written upside-down.  
When the product was launched, it was called the 01W.

*Let's do The Pole... we'll make some broken rock'n'roll!*

## EQUIPMENT LIST

Otari MX80 2" 24-track tape machine  
with Brian Roth output drivers  
TASCAM TSR-8 tape machine
